EXPERIENCE

Volunteer Software Engineer

Teenage Helpline

📅 10/2024 - Present   📍 remote

- Contributed to the redevelopment of the Teenage Helpline website into Youth4Youth.
- Maintained code integrity for project by utilising Git for version control.
- Developed the backend using Strapi as the CMS and implemented the frontend with TypeScript and Next.js to create a modern, scalable website.

JavaScript Software Development Bootcamp

Northcoders

📅 07/2024 - 03/2025   📍 remote

- I successfully completed an intensive software development training program at Northcoders, a leading UK-based bootcamp, where I gained hands-on experience with technologies like HTML, CSS, JavaScript, React, Express, Postgres, and SQL.

Software Engineer

DreamOrbit

📅 12/2019 - 12/2021   📍 Bangalore, INDIA

- Contributed to the development of an employee compliance solution, managing personal trading surveillance, employee certifications, gift and entertainment requests, disclosures and more.
- Collaborated in an Agile environment using Jira for sprint planning, task tracking, and project management to improve workflow efficiency and team collaboration.
- Developed a scalable .NET application using Dependency Inversion Principle in .NET Core, WEB API, C#.
- Developed and maintained databases using SQL Server.
- Utilised JavaScript, TypeScript and Angular to create impactful user-centric solutions.

Software Engineer

QXGlobalgroup

📅 10/2018 - 10/2019   📍 Ahmedabad, INDIA

- Designed and developed scalable .NET applications, including an employee management system, Quality Management System (QMS), and HR-related form solutions.
- Analysed and interpreted client requirements to drive and shape software development processes.
- Utilised ASP.NET MVC 5 with C# and SQL Server to build robust, data-driven applications.
- Utilised JavaScript to create impactful user-centric solutions.

Junior Software Developer

Aussizz Group

📅 05/2017 - 06/2018   📍 Ahmedabad, INDIA

- Contributed to a project similar to Eventbrite.
- Experienced in ASP.NET, VB.NET, ADO.NET, C#, and AngularJS, with a strong background in full-stack development.
- Managed the full development lifecycle, from conceptualization through design, testing, and deployment, ensuring quality and timely delivery.

SUMMARY

Experienced Software Engineer with 4+ years of expertise in designing, developing, and optimising scalable web and software applications. Following a career break, I am now actively refreshing my skills through Northcoders and contributing as a volunteer software engineer at Teenage Helpline. Eager to bring a problem-solving mindset and collaborative approach to dynamic teams, with a strong commitment to delivering impactful software solutions.

SKILLS

Javascript   WEB API   C#

.NET Core   Typescript   Git

GitHub   MS SQL Server Database

Test Driven Development(Jest)   node.js

PSQL   HTML   CSS   React   JIRA

ASP.NET   MVC   AWS   LINQ

strapi   .next JS

Self Motivated   Eager to Learn

Detail Oriented   Problem-Solving

PORTFOLIO PROJECT

AirbNC

📅 01/2025 - 03/2025

Developed a full-stack, Airbnb-inspired platform with user authentication, enabling guest users to explore properties, add favourites, leave reviews, and make hassle-free reservations.

- The backend is built with PostgreSQL and Node-Postgres, following the MVC architecture for structured development. API routing is handled with Express, with integration testing ensuring reliability.
- The frontend is powered by React (JavaScript), delivering a dynamic and responsive user experience.
